

# HCL Clara Virtual Assistant for HCL Workload Automation

Demo

## **Scenario 3** **Monitoring a job**

## Before you start Demo Scenario 3

- This Demo Scenario requires you first run part 3 (Adding user access) of the Demo Scenario 1: Meet Clara.
- If the warning message “Notifications are disabled” appears on Clara chat window, click the provided button to enable Clara notifications in your browser.

### 1. Monitoring a submitted job

#### Steps:

1. You want to submit the job DEMO\_SCENARIO3.
  - Type: **Submit job DEMO\_SCENARIO3**
2. Clara asks for a job alias.
  - Select Clara’s tip: **No alias**.
3. Clara asks for a confirmation to submit the job.
  - Select **Yes**.
4. Clara informs you she submitted the job.
5. **Run this step and the following one within one minute from the previous one.**  
You want to check the job status.
  - Type: **Status last job**  
(Repeat this command until it shows the job internal status of “EXEC”).
6. Clara informs you that the job shows the internal status of “EXEC”.
  - Select Clara’s tip: **Monitor this job** to ask Clara to monitor the job and send a notification when the job status changes.
7. Clara confirms she will monitor the job.
8. After a while, you receive a message notification on Clara chat window indicating that the job ended abnormally.
9. Click the gray bell on the chat header to view details about the notification.

### 2. Analyzing the joblog

#### Steps:

1. You want to know more about the job abnormal end.
  - Type: **Current plan status**
2. Clara provides a donut chart representing the overall status of the current plan: it shows 1 job in error.
  - Select Clara’s tip: **Show me jobs in error**
3. Clara displays the jobs with ABEND status (1)
  - Select the only job.
4. Clara provides information about the job.
  - Select Clara’s tip: **Show me the joblog**
  - Then, select Clara’s tip: **Open in a new tab**
5. In the new tab, you can review the log for problem details. Close the tab when you are finished.
