

HCL Clara Virtual Assistant for HCL Workload Automation

Demo

Scenario 3

Monitoring a job

Before you start Demo Scenario 3

- This Demo Scenario requires you first run part 3 (Adding user credentials) of the Demo Scenario 1: Meet Clara.
- If the warning message “Notifications are disabled” appears on Clara chat window, click the provided button to enable Clara notifications in your browser.

1. Monitoring a submitted job

Steps:

1. You want to see the topics Clara can help you with.
 - Type: **What can you do?**
2. Clara shows the smart cards representing the categories of actions she can run on your behalf.
 - Select: **Managing your workload**
 - Then, select the action: **Submit a job**
3. Clara provides a list of jobs.
 - Select the job: **DEMO_SCENARIO3**
4. Clara asks for a job alias.
 - Select Clara’s tip: **No alias.**
5. Clara asks for a confirmation to submit the job.
 - Select **Yes.**
6. Clara informs you she submitted the job.
7. You want to check the job status (please, run this step and the following one within a minute!).
 - Type: **Status last job**
8. Clara informs you that the job is in EXEC status.
 - Select Clara’s tip: **Monitor this job** to ask Clara to monitor the job and send a notification when the job status changes.
9. Clara confirms she will monitor the job.
10. After a while, you receive a message notification on Clara chat window indicating that the job ended abnormally.
11. Click the gray bell on the chat header to view details about the notification.

2. Analyzing the joblog

Steps:

1. You want to know more about the job abnormal end.
 - Type: **Current plan status**
2. Clara provides a donut chart representing the overall status of the current plan: it shows 1 job in error.
 - Select Clara’s tip: **Show me jobs in error**
3. Clara displays the jobs with ABEND status (1)
 - Select the only job.
4. Clara provides information about the job.
 - Select Clara’s tip: **Show me the joblog**
 - Then, select Clara’s tip: **Open in a new tab**
