iQ.Suite

Central management and superior protection for your communication and collaboration
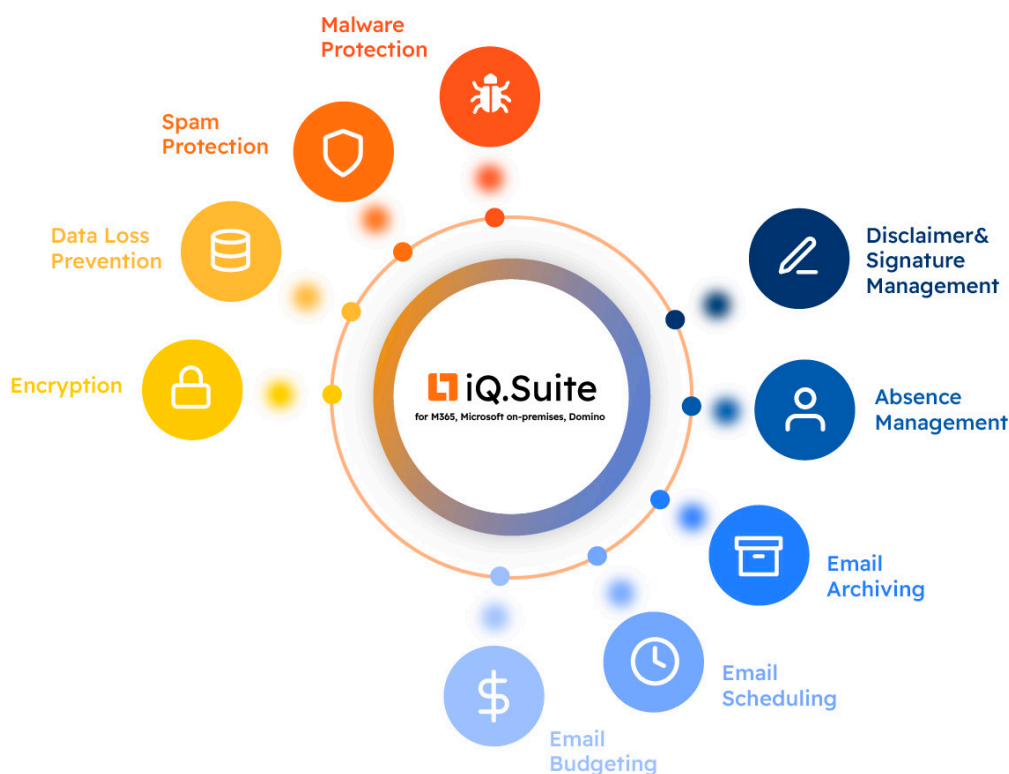

iQ.Suite is an Email Management and Collaboration Security platform that provides enterprise-level security, productivity and compliance for your communication.

Email remains the most common channel used by cybercriminals to attack enterprises. As the requirements and scope of security grow, organizations need a centralized solution to manage this complexity.

For many years, iQ.Suite has been providing to thousands of customers one of the most comprehensive sets of security features and capabilities on the market.

On-premises, it covers both Domino and Microsoft Exchange and integrates seamlessly with any other email solution through SMTP.

In the cloud, our solution is offered as a Service iQ.Suite aaS so customers can benefit from the flexibility and ease of use without having to manage it themselves.
