

# GPI Translation Services Connector for HCL Digital Experience

HCL Digital Experience

The GPI Translation Services Connector is a powerful tool designed to seamlessly integrate with HCL Digital Experience, enabling smooth and efficient translation workflows. With this connector, HCL Digital Experience users can easily manage and deliver trusted multilingual digital experiences to global audiences.

The screenshot shows the GPI Translation Services Connector interface. On the left is a sidebar with a 'Web Content' menu and various tools like 'Content Composer', 'Authoring', 'Content Reporting', 'Preview', 'Web Content Libraries', 'Syndicators', 'Subscribers', 'Feed Configurations', 'Feed Jobs', 'WCM Support Tools', 'Multi-locale Library Copy Application', and 'GPI Translation Connector' (highlighted). The main area displays 'Quotes' and 'Projects' tables. The 'Quotes' table has columns for Quote Name, Status, Created By, Created On, Languages, and Action. It lists three quotes: 'Quote #96009 » Meet us' (Quote in Progress), 'Quote #96003 » Contact us' (Quote Finished), and 'Quote #96000 » Our products' (Quote in Progress). The 'Projects' table has columns for Project Name, Status, Created By, Created On, Languages, and Action. It lists two projects: 'Quote #96002 » Project 1' (Project Started) and 'Quote #95771 » About us' (Project Completed). Both tables include search bars, pagination (Show 5 entries), and navigation buttons (Previous, 1, Next).

Quote Name	Status	Created By	Created On	Languages	Action
Quote #96009 » Meet us	Quote in Progress	admin	14.09.2023 10:09	From: English To: Spanish,French	View Report
Quote #96003 » Contact us	Quote Finished	admin	14.09.2023 10:09	From: English To: Spanish,French	View Report
Quote #96000 » Our products	Quote in Progress	admin	14.09.2023 09:09	From: English To: French	View Report

Project Name	Status	Created By	Created On	Languages	Action
Quote #96002 » Project 1	Project Started	admin	14.09.2023 09:09	From: English To: Spanish	Actions
Quote #95771 » About us	Project Completed	admin	06.09.2023 06:09	From: English To: French	Actions

## Key Features:

### Streamlined Translation Workflows

The GPI Connector simplifies the translation process by providing a centralized platform within HCL Digital Experience. It allows you to easily send content for translation, track progress, and receive translated content back into your system.

### Seamless Integration

The connector seamlessly integrates with HCL Digital Experience, harnessing its robust features and capabilities. It enables you to conveniently manage translations directly within the platform. Additionally, you gain access to a comprehensive range of reports and tools through your account on GPI's Translation Portal. These resources empower you to track the progress of your translation projects, monitor translation expenses, translation memory leverage, and much more.

### Efficient Collaboration

The GPI Connector and Portal facilitates collaboration between content creators, translators, and reviewers. It provides a collaborative environment where stakeholders can communicate, review translations, and maintain consistent terminology and branding across languages.

### Automated Translation Workflows

With built-in automation, the connector optimizes translation workflows by eliminating repetitive tasks. It enables automatic content extraction, translation submission, and import of translated content back into HCL Digital Experience.

### Extensive Language Support

The GPI Connector supports a wide range of languages, allowing you to reach global audiences effectively. It ensures accurate and high-quality translations including comprehensive quality assurance across diverse content types, including web pages, documents, multimedia files, and more.

### Enhanced Control and Visibility

Gain complete control and visibility over the translation process. Monitor progress, track costs, and access detailed reports to analyze translation performance and make informed decisions.

### Flexible Language Translation Models

Decide if your content needs human translation teams or neural machine translation (NMT) plus post editing. GPI offers AI-based machine translation options where appropriate, combining rules based and neural machine translation models plus post editing.

Experience the power of the GPI Translation Services Connector for HCL Digital Experience and unlock the potential of multilingual content delivery. Simplify your translation workflows, improve efficiency, and enhance the global reach of your digital experiences.

Globalization Partners International (GPI) was founded in Washington, DC in 2001 by a global team of language and technology professionals with a history of delivering comprehensive translation services to companies around the world. Our team's core mission is to help companies communicate and conduct business in any language and in any locale. Our suite of key tools & technologies help our clients translate content in a more cost-effective, consistent and culturally correct manner.
