**Sample Domino Application Tile**

Download Extension

**Version: 1.0**

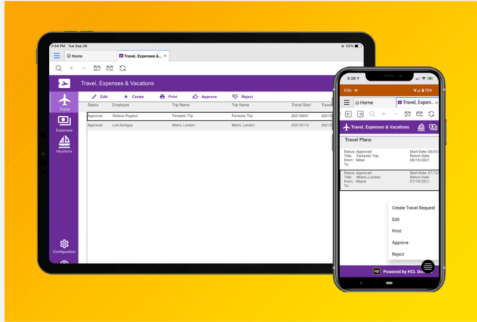

This is an example of a Domino Marketplace Application tile. Tiles like this are used to showcase free downloads available for the greater Domino community. All of the Application tiles use this same standardized page format.

In this first section, provide a high-level description of your application, what it does, and what problem(s) it addresses. If there are particular technical prerequisites or skills needed, mention them here.

To the right are screenshots of your application. You may include up to 12 individual screenshots. For best viewing, they should all be similar in shape to one another (but do not have to be exactly the same). Don't mix horizontal and vertical images, if possible.

The section immediately below helps define who your application is for, and which versions of Domino it supports. For your information purposes, we are showing *all* the possible options for all of the multiple-value fields except *Minimum Domino Version*.

<b>User Type</b>	<b>Optimized For</b>
User	Browser
Developer	Desktop
Administrator	Mobile
	Tablet
<b>Platform</b>	<b>Minimum Domino Version</b>
AIX	Domino 6.x or higher
Android	
Linux	
IBMi (Series)	
iOS	
MacOS	
Windows	

This is a sample download file intended only to demonstrate the download feature of Domino Marketplace application tiles. More likely than not, your download will actually be a Domino NSF, NTF, or a related ZIP file.

If there are particular instructions you need to include outside of the application file, please use a PDF and include it in a ZIP file along with the application file(s).
